About Me

Fullstack Developer with over 6 years of experience in Node.js, React, Next.js, and TypeScript. Specialized in performance, scalability, and software best practices, contributing directly to helping teams and companies transform ideas into high-impact digital solutions.

Experience

07/2025 – 12/2025 · Mobile Front-End Developer · Clube dos Empresários
Improved performance and implemented complex screens and user flows, including features similar to those found on Instagram. Managed modules such as post creation, comments, user profile, explorer, and other key functionalities of the app.

05/2021 - 06/2021, FrontEnd Developer, Primetag
Worked as a Front-End Developer on the creation of a Next.js landing page, focusing on SEO, performance, and reusable components to reduce costs and optimize delivery. Implemented interactive charts to enhance metric visualization and used tools that improved the project's overall stability. This experience, conducted with an international team, strengthened my remote collaboration skills.

01/2021 - 04/2021, Fullstack Developer, Chamaforte

Developed an app for the company's technicians to streamline the management of orders placed in-store and online. The app was built with React Native and integrated with an Express.js API connected to both the admin dashboard and the main website. The interface was designed using Styled Components to ensure visual consistency and meet the project's requirements.

Certifications

08/2021 - 01/2022, UI/UX - Origamid
02/2017 - 06/2017, Desenvolvedor Fullstack - DankiCode
